

Gas Exchange Exam Style Questions 1

1. Cells require oxygen so that they can respire and produce energy. Which of the following shows the route taken by oxygen to reach the cells? the correct box.

- nose > lungs > windpipe > bloodstream > cells
- nose > bloodstream > lungs > windpipe > cells
- nose > windpipe > lungs > bloodstream > cells
- nose > lungs > bloodstream > windpipe > cells

2. Respiration takes place in the cells of all organisms. Complete the word equation for respiration.

_____ + oxygen > carbon dioxide + _____ + energy

3. As a result of respiration, the proportions of oxygen and carbon dioxide in inhaled and exhaled air vary. Which of the following statements are true? the correct boxes.

- Air breathed out has more carbon dioxide and more oxygen than air breathed in.
- Air breathed out has less carbon dioxide and less oxygen than air breathed in.
- Air breathed out has more carbon dioxide and less oxygen than air breathed in.
- Air breathed out has less carbon dioxide and more oxygen than air breathed in.
- Air breathed out contains more water vapour and more carbon dioxide than air breathed in.

Gas Exchange Exam Style Questions 1 Answers

1. Cells require oxygen so that they can respire and produce energy. Which of the following shows the route taken by oxygen to reach the cells? the correct box.

- nose > lungs > windpipe > bloodstream > cells
- nose > bloodstream > lungs > windpipe > cells
- nose > windpipe > lungs > bloodstream > cells
- nose > lungs > bloodstream > windpipe > cells

2. Respiration takes place in the cells of all organisms. Complete the word equation for respiration.

glucose + oxygen > carbon dioxide + **water** + energy

3. As a result of respiration, the proportions of oxygen and carbon dioxide in inhaled and exhaled air vary. Which of the following statements are true? the correct boxes.

- Air breathed out has more carbon dioxide and more oxygen than air breathed in.
- Air breathed out has less carbon dioxide and less oxygen than air breathed in.
- Air breathed out has more carbon dioxide and less oxygen than air breathed in.
- Air breathed out has less carbon dioxide and more oxygen than air breathed in.
- Air breathed out contains more water vapour and more carbon dioxide than air breathed in.
