

# Year 11 Photography

Photography is a subject that encourages us to look closely at the world around us. As year 11's you have been developing work over the past two years that demonstrated an understanding of how photographers do this and how you can recreate this in your own work. These are skills that you may wish to nurture and develop over time. In order to continue developing your skills and photographic eye we have put together some work to support you.

## Analysing and writing about photographs:

**Content and Composition:** Can you describe what is in these pictures and can you write about the layout of each image?

Can you write about the Formal Elements of each picture? Remember the formal elements are things like colour, tone, line, texture.

What are your thoughts and opinions about these images and what do you notice about this work?

Irving Penn

Edward Weston

## Practical – Use your camera

All these photographers use Still Life objects to create their work.

Using the objects around you compose your own still life work in the style of these photographers.

Robert Mapplethorpe

Josef Sudek

Andy Warhol

Suzanne Saroff
